TAMPON APPLICATORS
TRASH

**"FLUSHABLE" WIPES
ARE NOT SO FLUSHABLE....**

Did you know that baby wipes may specify they are flushable, but they should not be put in our wastewater system? This also includes adult wipes, cleaning wipes (Clorox, Lysol), medical wipes, etc.

In fact, the only paper product that should be "flushed" is toilet paper. It is the only paper designed to break down as it travels through the wastewater treatment process.

The accumulation of matted up wipes and pads becomes a large impassable mass which blocks the ordinary flow of wastewater.

This issue affects everyone.

If the problem is not alleviated soon, these extra expenses may be passed on to you, the tax payer.

**DJ IN THE PARK
NAME CHANGED TO
"MAIN STREET MUSIC FEST"
Saturday June 2, 2018
